

## Biology Homework

### Mitosis

1. What types of cells are unspecialised in an animal?
2. Which type of cells are unspecialised in plants?
3. What comes after prophase?
4. What comes before telophase?
5. Are cells produced by mitosis diploid or haploid?
6. Where do chromosomes line up during metaphase?
7. What happens after mitosis?
8. What happens before prophase?

Explain what happens during the interphase of the cell cycle.

Describe the daughter cells produced during mitosis.

Exam Style Question

List the 4 stages of mitosis and explain what happens at each stage. (4marks)
